Disclaimer

This report may contain forward-looking statements regarding Inter, anticipated synergies, growth plans, projected results and future strategies. Although these forward-looking statements reflect management's good faith beliefs, they involve known and unknown risks and uncertainties that may cause the Company's actual results or outcomes to be materially different from those anticipated and discussed herein. These statements are not guarantees of future performance. These risks and uncertainties include, but are not limited to our ability to realize the amount of the projected synergies and the timetable projected, as well as economic, competitive, governmental and technological factors affecting the Company, markets, products and prices, and other factors. Commission which readers are urged to read carefully in assessing the forward-looking statements contained herein. This presentation contains managerial numbers that may be different from those presented in our financial statements. The calculation methodology for those managerial numbers is presented in Inter quarterly earnings release.

The numbers for our key metrics (Unit Economics), which include our monthly active users (MAU), daily active users (DAU), average revenue per user (ARPU) and cross-selling index (CSI), are calculated using internal company data. While these numbers are based on what we believe to be reasonable estimates, there are inherent challenges in measuring usage of our products. In addition, we are continually seeking to improve our estimates of our user base, and such estimates may change due to improvements or changes in our methodology. We regularly review our processes for calculating these metrics, and from time to time we may discover inaccuracies in our metrics or make adjustments to improve their accuracy, including adjustments that may result in the recalculation of our historical metrics.
